

Instrumentation Refresher

Course Description

Do you need to brush up on your skills? Or did you receive subpar training elsewhere?

Volt Edge has the answer for you! We offer a **non-accredited** refresher course for Instrumentation that highly emphasises practical training. We don't teach you the theory in class, just the practical components. However, you will still have access to our workbook which you can read and study at your leisure prior to attending.

Students will revisit topics such as energy policy and procedures, problem solving for a wide variety of measurements, and drawing of equipment manuals etc.

Cost: \$1, 990 (GST Incl).

Content Delivery & Pre-requisites

This course is delivered face to face, at our Training Centres in Brisbane, Sydney or Melbourne, over the duration of 1 to 2 weeks.

You must have completed either of the following courses previously, whether with us or a different RTO:

UEE31211

Certificate III in Instrumentation and Control

OR

UEE40411

Certificate IV in Electrical – Instrumentation
