

HIGH VOLTAGE RECIPIENT

This High Voltage Recipient course is designed for students to receive and manage High Voltage permit systems. Enrol and begin the very same day!

Course Description

The student normally an Electrician but non Electrical personnel can complete the High Voltage recipient course and receive a Statement of Attainment once deemed competent.

This person once familiarised with your site can be signed off to receive access and test permits in a High Voltage installation, manage the process and then surrender when finished the HV work, as part of a High Voltage switching procedure or program.

The training course has a practical component if using an access system to plan, complete and manage a HV permit system. This is completed on two occasions once using Volt Edge permit systems and one using your own permit systems.

Delivery

With 80:20 theory to practical, the theory and assessment practicals are completed and submitted online at the students page.

Unit of Competency

UEPOPS021 - Control permit to work operations.

Entry Requirements

Students will need to be working and have a supervisor/mentor who holds the unit of competency to sign off on third party forms. If not employed or have access, students can book and pay an extra fee to attend a training centre to complete practical requirement.

Assessments

Students will complete a theory assessment and workplace observation.
