

Practical Install Refresher Only for Certificate II in Split Air Conditioning and Heat Pump Systems

Course Description:

Refresh your hands-on skills before your second install sign-off! This refresher session is designed for students who have already completed the theory and first installation component of the Certificate II in Split Air-conditioning and Heat Pump Systems and want additional practical support before completing their second install.

✔ What You'll Cover:

- Practical review of single-head split system installation
- Hands-on guidance from qualified trainers
- In-class support to build confidence before workplace assessment
- Opportunity to complete your second install onsite with trainer (additional fee applies)

📌 Who Should Attend?

- Students currently enrolled in the Certificate II Split System Course
- Learners preparing to complete their second install sign-off
- Those wanting extra confidence and clarity before final assessment

🕒 Duration:

- 1 Day – Face-to-face practical training session

🧰 What to Bring:

- PPE – Long sleeve short and long pants

REMINDER:

This is not a full course – it's a practical refresher only. Ideal if you've had a gap between your first install and your second, or just want extra time with a trainer before finalising your qualification.
